MORBIDITY REPORT

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

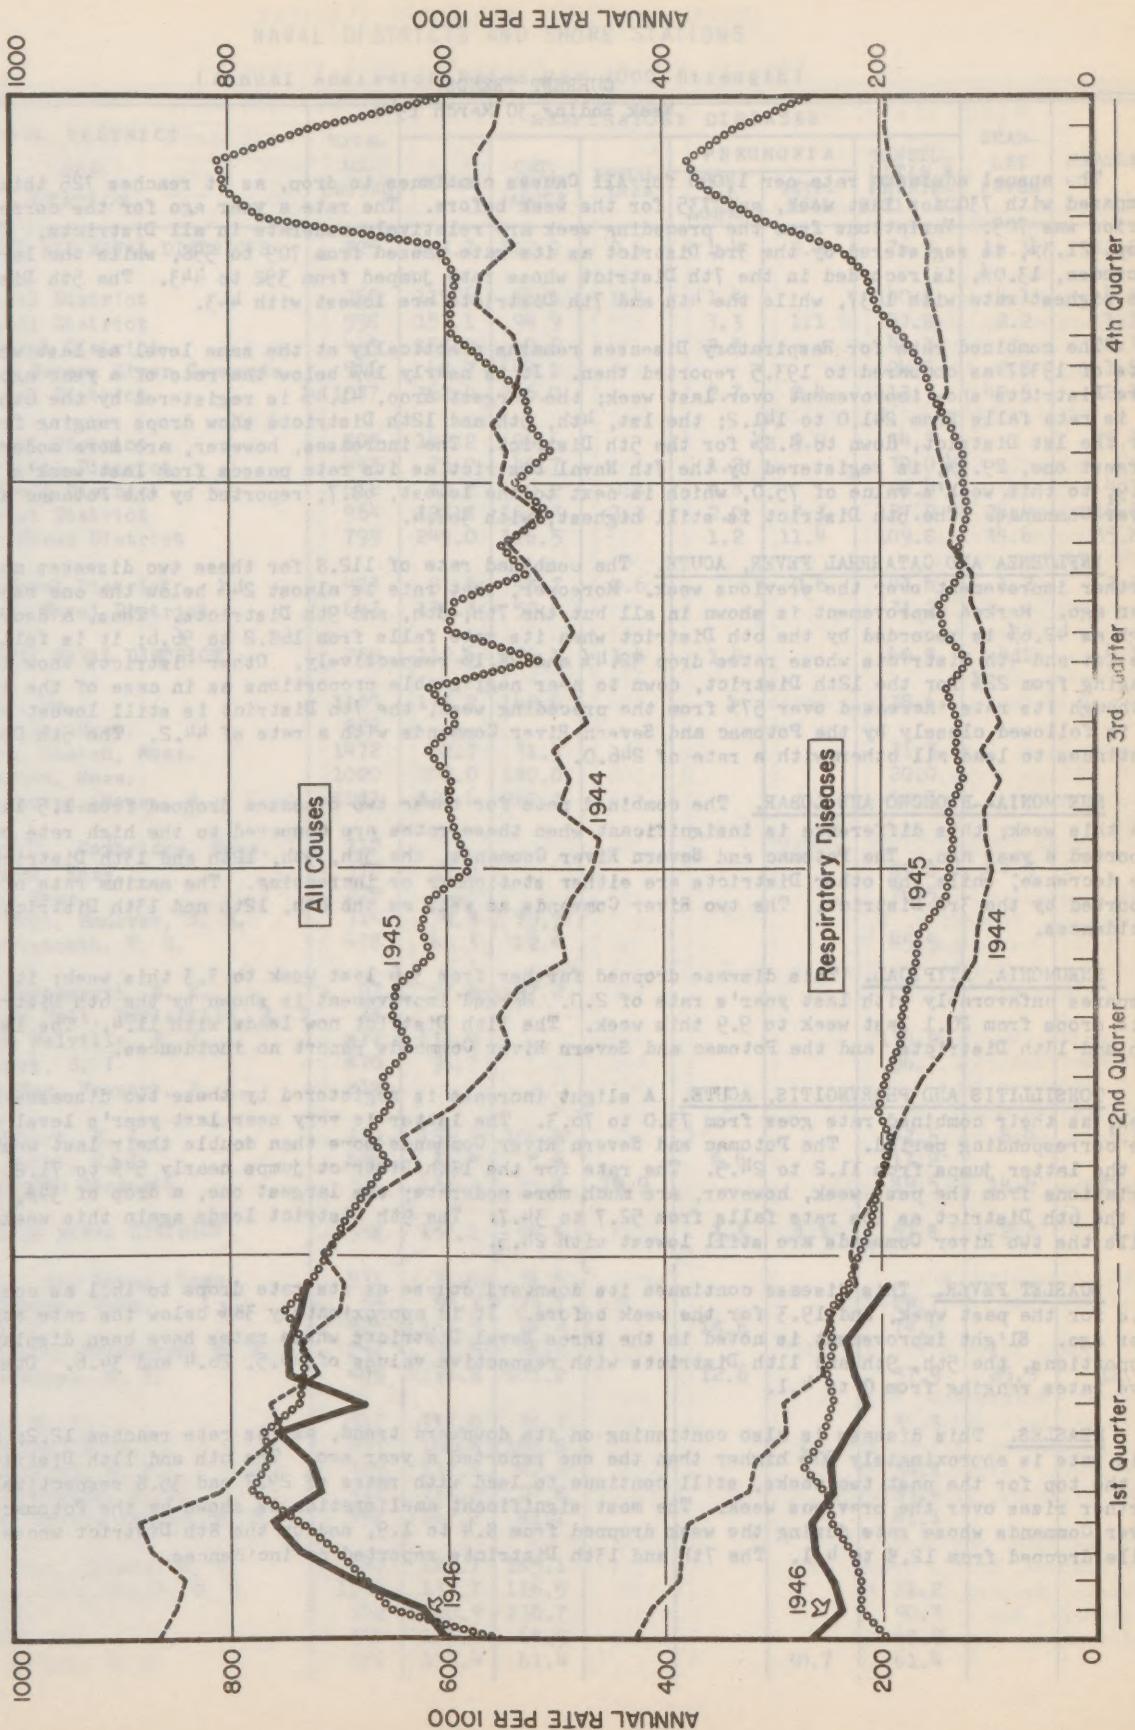

Respiratory Diseases

WEEK ENDING 30 March 1946REPORT NO. 222

RESTRICTED — THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED
DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

CURRENT TRENDS

Week Ending 30 March 1946

The annual admission rate per 1,000 for All Causes continues to drop, as it reaches 725 this week as compared with 730 for last week, and 735 for the week before. The rate a year ago for the corresponding period was 709. Variations from the preceding week are relatively moderate in all Districts. The largest drop, 21.3%, is registered by the 3rd District as its rate passed from 709 to 558, while the largest increase, 13.0%, is recorded in the 7th District whose rate jumped from 392 to 443. The 5th District has the highest rate with 1037, while the 4th and 7th Districts are lowest with 443.

The combined rate for Respiratory Diseases remains practically at the same level as last week, with a rate of 193.7 as compared to 193.5 reported then. It is nearly 14% below the rate of a year ago. Only five Districts show improvement over last week; the largest drop, 41.4% is registered by the 6th District as its rate falls from 241.0 to 141.2; the 1st, 4th, 5th and 12th Districts show drops ranging from 23.2% for the 1st District, down to 4.8% for the 5th District. The increases, however, are more moderate; the largest one, 29.5%, is registered by the 7th Naval District as its rate passes from last week's low of 57.9, to this week's value of 75.0, which is next to the lowest, 68.7, reported by the Potomac and Severn River Commands. The 5th District is still highest, with 362.4.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The combined rate of 112.8 for these two diseases marks a further improvement over the previous week. Moreover, that rate is almost 24% below the one reported a year ago. Marked improvement is shown in all but the 7th, 8th, and 9th Districts. Thus, a decrease as high as 42.6% is recorded by the 6th District when its rate falls from 168.2 to 96.6; it is followed by the 1st and 4th Districts whose rates drop 32.4% and 28.1% respectively. Other Districts show decreases ranging from 22% for the 12th District, down to near negligible proportions as in case of the 3rd District. Although its rate increased over 57% from the preceding week, the 7th District is still lowest with 43.7; it is followed closely by the Potomac and Severn River Commands with a rate of 44.2. The 5th District continues to lead all others with a rate of 246.0.

PNEUMONIA--BRONCHO AND LOBAR. The combined rate for these two diseases dropped from 1.5 last week to 1.4 this week; this difference is insignificant when these rates are compared to the high rate of 4.0 reported a year ago. The Potomac and Severn River Commands, the 5th, 9th, 12th and 13th Districts are on the decrease, while the other Districts are either stationary or increasing. The maximum rate of 3.3 is reported by the 3rd District. The two River Commands as well as the 6th, 12th and 13th Districts show no incidences.

PNEUMONIA, ATYPICAL. This disease dropped further from 3.6 last week to 3.3 this week; it still compares unfavorably with last year's rate of 2.0. Marked improvement is shown by the 6th District as its rate drops from 20.1 last week to 9.9 this week. The 11th District now leads with 11.4. The 1st, 4th, 7th, 8th and 13th Districts, and the Potomac and Severn River Commands report no incidences.

TONSILLITIS AND PHARYNGITIS, ACUTE. A slight increase is registered by these two diseases for the week, as their combined rate goes from 73.0 to 76.3. The latter is very near last year's level of 78.0 for the corresponding period. The Potomac and Severn River Commands more than double their last week's rate, as the latter jumps from 11.2 to 24.5. The rate for the 13th District jumps nearly 52% to 71.2. Other variations from the past week, however, are much more moderate; the largest one, a drop of 34%, is recorded by the 6th District as its rate falls from 52.7 to 34.7. The 9th District leads again this week, with 157.9, while the two River Commands are still lowest with 24.5.

SCARLET FEVER. This disease continues its downward course as its rate drops to 16.1 as compared with 17.2 for the past week, and 19.3 for the week before. It is approximately 38% below the rate reported a year ago. Slight improvement is noted in the three Naval Districts whose rates have been displaying epidemic proportions, the 5th, 9th and 11th Districts with respective values of 40.5, 26.4 and 34.6. Other Districts have rates ranging from 0 to 4.1.

MEASLES. This disease is also continuing on its downward trend, as its rate reaches 12.2; nevertheless, this rate is approximately 50% higher than the one reported a year ago. The 6th and 11th Districts, who were at the top for the past two weeks, still continue to lead with rates of 29.7 and 35.8 respectively, marking further rises over the previous week. The most significant amelioration is shown by the Potomac and Severn River Commands whose rate during the week dropped from 8.4 to 1.9, and by the 8th District whose rate meanwhile dropped from 12.8 to 4.1. The 7th and 13th Districts reported no incidences.
